

Maintenance

If misting head is not providing a fine mist, there could be a build up of calcium on the head. First with the mister on; try using your finger nail or brush and lightly scrape the head of the mister. If it does not allow proper misting, turn off mister and remove misting head. To disconnect, push the ring at the mouth of the fitting toward the fitting and simultaneously pull the tube out of it. You may need pliers; be careful not to pinch head or tubing.

To clean the head use a product like CLR or Lime Away. Pour a small amount into container enough to cover the mister head and follow instructions on bottle for how long to soak. Once head is clean it can be reinserted in system. Be sure misting head is rinsed thoroughly with clean water prior to putting it back into misting system.

Routine Maintenance

Heads should be routinely cleaned every 3 months or before a long storage using the instructions above, this will prevent the build up of calcium and lime in the misting heads.

PRODUCT LIMITED WARRANTY

Mist-er-Comfort warrants that Mist-er-Comfort's products shall be free of defect in materials and workmanship under normal use within the operating specifications for a period of **one (1) year** from the date of purchase provided that:

The above warranty shall not apply to any such product part thereof which is damaged as a result of neglect, misuse, alteration, accident, normal wear and tear, misapplication, fire, act of God, freezing, hot water, chemical, flammable or salt water;

Purchaser's exclusive remedies under the above warranty shall be limited to the repair or replacement of the non-conforming product or part(s) thereof, as determined by Mist-er-Comfort.

Any non-conforming product must be returned to Mist-er-Comfort within one (1) year from its purchase.

The warranty contained above does not extend to any goods not manufactured by Mist-er-Comfort even though supplied by Mist-er-Comfort. Goods not manufactured by Mist-er-Comfort carry only the warranty (if any) of their makers and the Purchaser is entitled to the benefit thereof only so far as Mist-er-Comfort has the power to transfer it;

Mist-er-Comfort shall not be liable for any special, indirect, or consequential damages;

IMPORTANT NOTE: Mister Nozzles have orifices as fine as human hair, hence bad water that has sediment and or hard water would drastically affect its performance of the nozzles by getting its orifices clogged.

BE SURE TO DRAIN TUBING AFTER EACH USE... NOT DOING SO WILL VOID THE WARRANTY.

There are no two water sources alike, hence it is the sole responsibility of the customer to protect his or her nozzles from getting clogged by installing the proper sediment or polyphosphate filter upstream from the misters, so they would be protected against sediment and lime buildup (if need be). When several nozzles get clogged together that is an obvious indication the water source is bad. If nozzles are subjected to bad water and they get clogged because of that, the misting system can not be returned. The warranty does not cover clogging due to sediments or lime build-up.

Product design can change at anytime without notice.

Return shipping and handling cost is to the expense of the customer/buyer.
