

## WIRELESS RF REMOTE

### WR-100

Mist-er-Comfort has been providing cooling relief to boaters, campers and tailgaters since 2004, becoming the leading choice for outdoor enthusiasts. Our misting systems provide hours of refreshing cool mist lowering the surrounding air temperature by as much as 25 degrees. The patent pending design forms a cool curtain of fine mist that acts as a barrier; separating you and your guests from the summer heat.

Our new wireless remote allows the user to turn on and off their misting system remotely. It easily attaches to all our 12VDC misting systems.

The receiver also has a second control zone to turn on/off another 12VDC device.

#### WR-100 WIRELESS REMOTE FEATURES
