

How to install Misting Bar

- ⇒ Screw misting heads into stems
- ⇒ Press stem into both couplers until you feel a click
- ⇒ Choose bimini bow you'd like the misting bar to be located
- ⇒ Measure to determine the middle of the bow.
- ⇒ Drill two 1/8" pilot holes 9in. on either side of the middle.
- ⇒ Use screws in the kit and mount the two clips in the holes.
- ⇒ Choose side for the misting tube to run down to misting pump.
- ⇒ Snap misting bar in place and insert misting tube into bar.
- ⇒ Use Velcro straps to secure the misting tube to the bimini top bow...note Velcro straps have a slot design to wrap around the misting tube so they never get lost.

- ⇒ If you choose to conceal misting tube inside the bimini pole drill a 3/8 inch hole in the top and bottom of the bimini support pole in which the misting bar is located.
- ⇒ Insert rubber grommet in the top hole and spray silicone
- ⇒ Push tubing into hole.
- ⇒ Use stiff wire to direct the misting tube out of hole.
- ⇒ Slide second grommet onto tubing using silicone spray and push it into the hole around the tubing.
- ⇒ Use the remaining instructions from the marine misting kit to connect misting tube into pump.

Maintenance

If a misting head is not providing a fine mist, there could be calcium build up on the head. First try using your finger nail or brush and lightly scrape the head of the mister. If it does not allow proper misting, turn off mister and replace head with spare mister head. To disconnect, push the ring at mouth of the fitting toward the fitting and simultaneously pull the tube out of it. You may need pliers; be careful not to pinch head or tubing.

To clean the head use a product like CLR or Lime Away. Pour a small amount of CLR or Lime Away into a container enough to cover the misting head and follow instructions on the bottle for how long to soak. Once head is clean it can be reinserted in the system. Be sure misting head is rinsed thoroughly with clean water.

Routine Maintenance

Heads should be routinely cleaned every 3 months or before a long storage using the instructions above, this will prevent the build up of calcium and lime in mister heads.

Product Limited Warranty

Mist-er-Comfort warrants that it's products shall be free of defect in material and workmanship under normal use within the operating specifications for a period of one (1) year from the date of purchase; see details on warranty information on our website.
